

# UniMessFix

## The universal clearance groove measuring indicator

With this patent-registered measuring system you can measure *easy*, *exact* and *fast* on your precision turning and groove workpiece the clearance groove and widths as well as inside and outside distances

## Your benefits

- multi-purpose measuring tool
- measuring in seconds
- directly on the production tool
- high precision
- nondestructive measuring
- simple application

### Operation range

Measuring way: 8,00mm

External diameter: 10,00-100,00mm

Inner diameter: 12,00- 80,00mm

Groove width: 1,10-80,00mm
